Jersey City, NJ

Partner Engineer with over 9 years of experience working with external clients; solving a wide array of technical problems and aiding with integrations. Skilled in building AI-powered tools and APIs to drive strategic solutions, with experience spanning LLMs, RAG, MCP, and full-stack development across enterprise and consumer products

SKILLS

Languages/Frameworks: Javascript, React, Swift, Xcode, Vue, Node, Express, SQL, Python, HTML/CSS, APIs

MarTech: Google Analytics, Big Query, Google Ads, Facebook Ads, Adobe Target, Marketo, Pardot, Campaign Manager

EXPERIENCE

Uber, New York

Partner Engineer

Oct 23 - Present

- Led "0 to 1" delivery integrations for major enterprise partners
 - Scaled monthly deliveries from 154k to 332k (+114.84%) while improving delivery success rates by 113 bps.
- Architected and built AI tool "PETE" in Python using LangFx (internal service built on LangChain), utilizing RAG, MCP, and advanced diagnostics to automate log analysis and knowledge retrieval for global support teams.
- Developed custom plugins/solutions in JavaScript/Python to map organizations for complex implementations, resulting in over 240,000 successful workflows and enabling new payment capabilities like US Cash trips.
- Engineered a custom cancellation endpoint to allow/reject order cancellations based on courier assignment, reducing courier-side order loss by a projected 890 orders per month.
- Streamlined financial onboarding by creating automated billing webhooks for decentralized organizations, reducing manual query friction for 11+ global clients.
- Managed high-stakes technical migrations, including a large-scale API transition and the rollout of a pickup pin code feature across 160+ client locations.

Branch, New York

Solutions Engineer/Technical Account Manager

Jan 23 - Oct 23

- Worked directly with developers debugging implementation issues across iOS, Android, and Web SDKs.
- Debugged JavaScript, Swift, and Java code to resolve technical challenges efficiently.
- Aided in the utilization of Branch's API for data export, enabling seamless data access and analysis.
- Led presentations on the benefits of Deep Linking, MMPs (Mobile Measurement Partners), and specific client use cases for enterprise, commercial, and strategic accounts.
- Utilized SQL for debugging backend and monitoring general account health.
- Assisted clients in navigating through the complexities of Ad Attribution and adapting to constant privacy changes.
- Managed Accounts totaling over \$2.5MM ACV

Twitter, New York

Partner Engineer II (Sr. Solutions Engineer)

May 22 - Jan 23

- Worked directly with Twitter's largest brands and partners such as Amazon, Walmart, and Publicis; overseeing implementation of the Ads API ecosystem that makes up 70% of Twitter's total revenue
- Saved 14MM by collaborating with internal product managers and engineers to discover an undocumented API endpoint, and provided multiple clients with written documentation and code snippets to achieve their application's needs
- Provided code suggestions and enhancements for the Twitter Ads and Conversion APIs to client engineers

Dun & Bradstreet, New York

Technical Implementation Consultant

Feb '20 - May 22

- Successfully carried out product installations using a wide variety of Tag managers (GTM, Adobe Launch, Tealium) and Marketing technologies (Marketo, Target, Pardot, Salesforce, Dynamics) for B2B Enterprise and medium-sized businesses
- Created [GTM Community tag](#) that integrated the Visitor Intelligence product directly into Google Analytics (measurement protocol), so marketing clients could export data without coding knowledge
- Routinely pulled client usage reports using SQL for QA and debugging issues
- Created innovative python scripts and web apps (React, Vue) to streamline and automate processes, saving over 20 business hours per month

3Q Digital, New York

Analyst, Senior Analyst, Data Technology Manager, Decision Sciences

Jul '17 – Feb'20

- Led a team that provided clients such as LinkedIn and Intuit with extensive Tag Management/Google Analytics Audits, including end to end gap analyses, goal funnels, general debugging, and writing custom JavaScript to implement robust, scalable, and extensive tagging solutions

Projects

Dinner Spinner

[Dinner Spinner App](#)

- Swift iOS App and Web app front-end developed using ReactJS framework to pick out local restaurants
- Backend utilizes Node/Express js, hitting the and Google Maps REST API
- 350 MAU

Mahjong Mamas

[Mahjong Mamas App](#)

- Built and shipped Mahjong Mamas, a full-stack social club app for iOS and Android using React Native (Expo), Supabase (Postgres + Edge Functions + Realtime), and EAS, from zero to live on both app stores, developed with Cursor and Claude Code via MCP integrations
- Designed multi-tenant architecture supporting multiple clubs with role-based access (owner/admin/member), invite codes, recurring game scheduling, RSVP/waitlist management, and in-game chat
- Integrated push notifications, Google/Apple SSO, avatar upload, calendar sync, and automated game reminders via Supabase Edge Functions and Expo Notifications — leveraging AI-assisted development workflows (Claude Code MCPs for Supabase, Discord, and deployment automation)

EDUCATION

Pace University

Master of Science, Computer Science

University of Delaware

Bachelor of Science, Exercise Science
